

How to Replace CF217/230/218A Series Chip?

In September 2016, HP released a new series of printers that included the M102, M132, M227 and others. These printers featured print speed 10% faster than previous generations. The cartridge structure separates the drum and toner. The automatic shutdown function can help users conserve energy. The printers also equipped with a mobile printing function and work well for daily use in medium and small enterprises.

Therefore,CF217/230/218A series toner cartridge is very hot in the market.

CF217/230/218A series toner cartridge with new compatible chip is available now.

However,CF217/230/218A series toner cartridge without chip can print the same page yield as the Original and quality printing.

How to replace CF217/203/218A series chip?

Proffisy® share some tips with everyone:

Step1: Take out original CF217/230/218A toner cartridge with OEM chip,

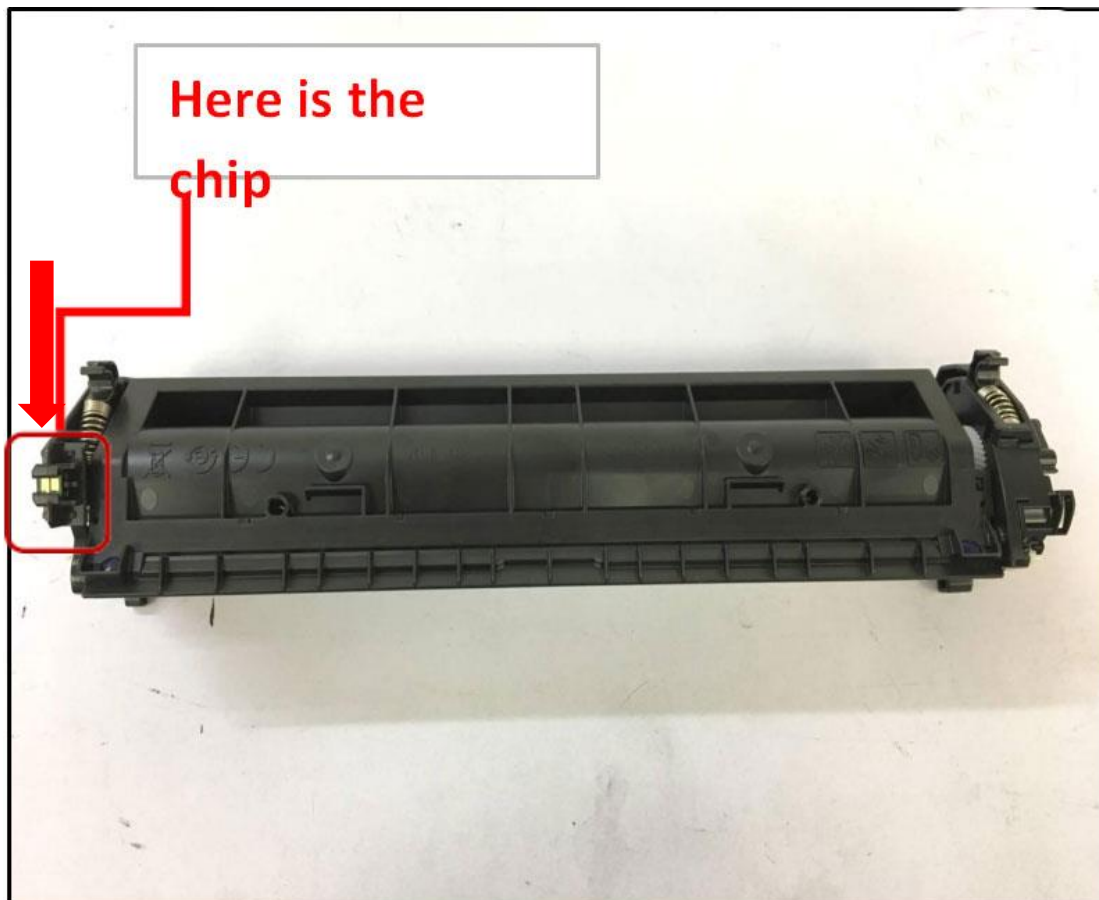

Then remove OEM chip from Original CF217/230/218A toner cartridge .

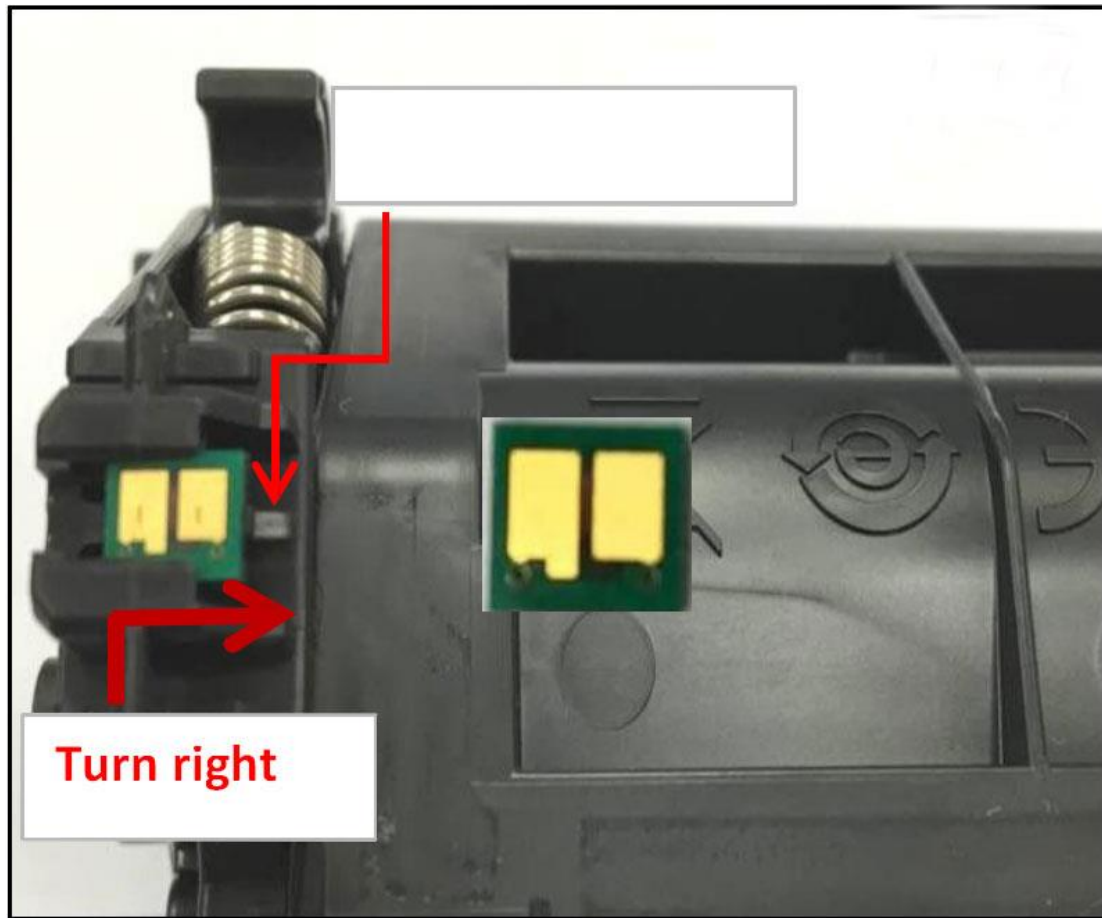

Step 2: Replace Proffisy® CF217/230/218A toner cartridge without chip,

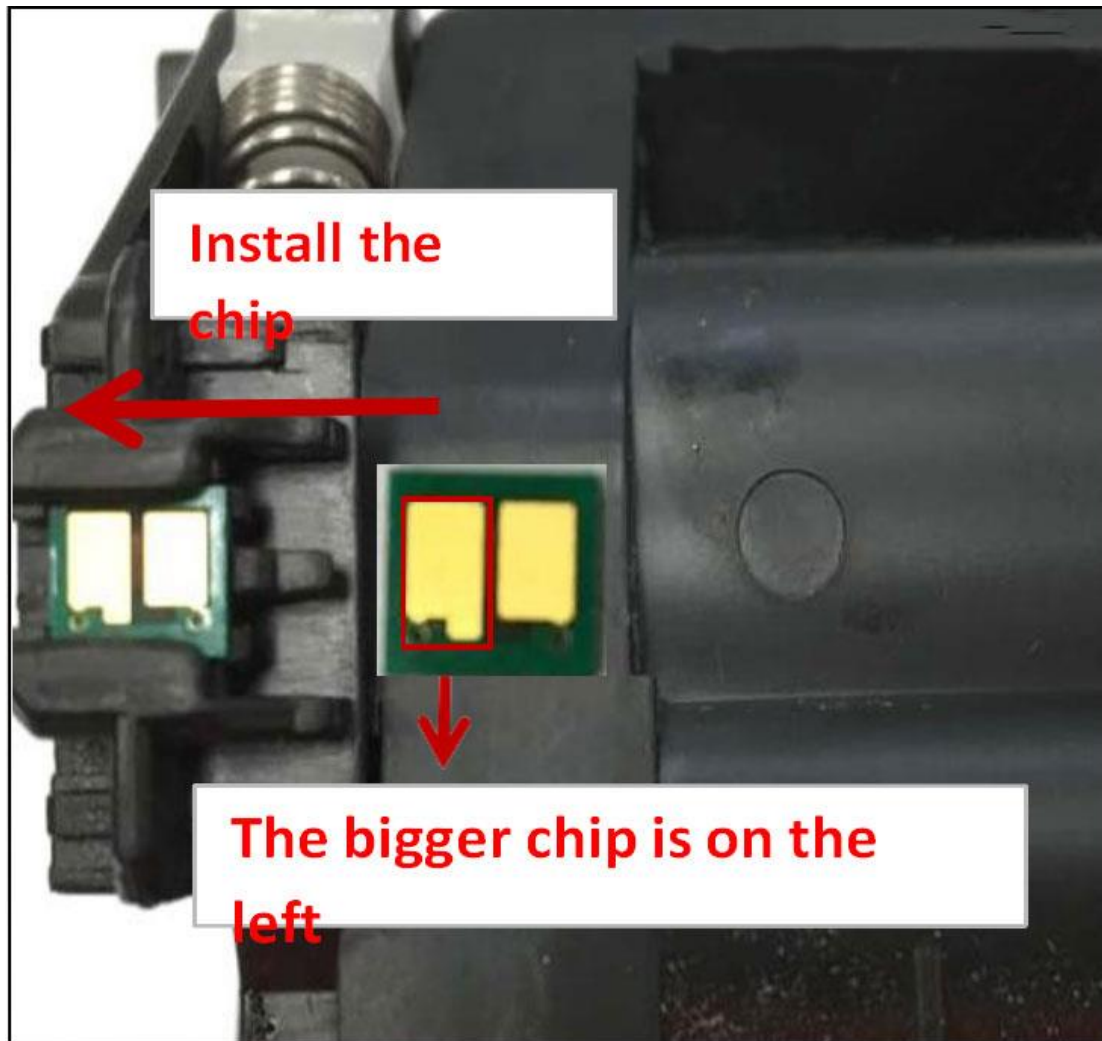

Find out the chip slot in compatible Proffisy® CF217/230/218A toner cartridge without chip.

Step 3: Press the long pin of chip to the slot bottom ,

Note: Long pin(Bigger chip pin) must be installed into slot bottom.

Step 4: Put Proffisy® compatible CF217/230/218A toner cartridge with chip back to printer.

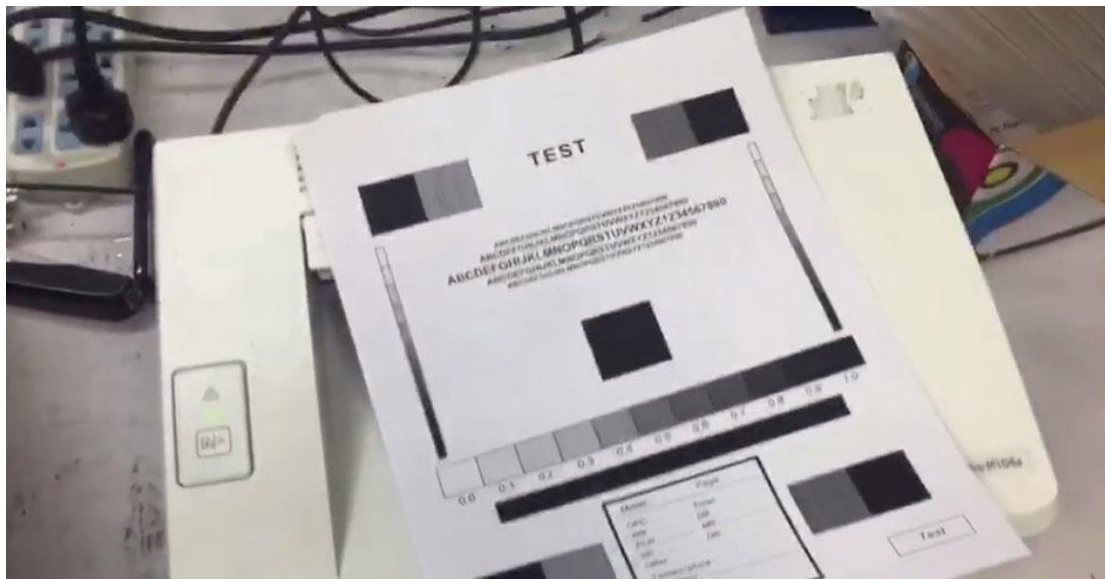

Warning: the machine will be destroyed when the toner powder is lower or without powder. Please ignore it and go ahead to print.

Finally: Compatible CF217/230/218A toner cartridge with OEM chip can be printed as Original quality.
